

**Dear partners and friends:**

For some tournaments held until now, we have been observing the low attendance of members at these tournaments, without knowing exactly the causes.

We think that it may be because of the prices, that there are indeed some differences with the previous ones. We also believe that it may be due to the distances that exist in the displacements towards those fields.

It is also true, the number of member cancellations that we have had in these two years of the Covid-19 Pandemic, which has broken our forecasts and has complicated everything.

We are making a greater effort in contact with the fields to improve and obtain better prices, but, due to the number of players that attend, it is not adequate to pressure the management of the different fields.

In this month of May (after the Cancellation of the Añoreta Tournament, (due to the amount of rain that fell on those days), we proposed to postpone it to May 26, but we have not received any confirmation, we planned to play in La Cala de Mijas , but it has been canceled for reasons beyond our control, (the course and greens are being punctured) so we have managed to set up June 9 at Atalaya New Course, with a consecutive start at a price of €79 with shared buggy and a buffet for the food.

With this I want to insist to all the partners that their attendance at the tournaments is essential for a good continuity of our association.

The fields according to agreements penalize us when attendance is less than expected as the agreement is not covered. Until a few months ago we have not had that problem, but things are changing given the situation today.

We expect our partners to be consistent, so as not to be penalized for lack of it.

Best regards.
